Light and Shadows

BINGO

Learn at Home with PBS KIDS

**Week of
January 18th**

Hello, Families!

Welcome to **Learn Along Bingo!** We're happy to share PBS KIDS activities with you and to work with PBS member stations and community partners across the country to help support learning at home. With Learn Along Bingo, children can view, explore, and play as they learn alongside their PBS KIDS friends on the PBS KIDS 24/7 channel. We hope your family will use it to inspire learning each and every day.

It's Lights and Shadows Week!

In this packet, there are printable activities and everyday learning ideas for you and your child to choose from. As you complete each square, mark it off to celebrate the learning.

Learning Spotlight: Shadows

This week, we're investigating light and shadows. We will learn that some materials block light creating a dark shadow on any surface beyond them, where the light cannot reach.

Show What You Know: I Spy Shadows Activity

The last activity in this packet is a perfect way for children to learn how light cannot pass through some materials.

Tune in: Watch **CURIOUS GEORGE** at 5pm on Tuesday, January 19th on the PBS KIDS 24/7 channel.

Ready for more? Watch your favorite PBS KIDS shows on the 24/7 channel and live stream at pbskids.org/video/livetv or on your local PBS station.

Happy learning!

Matching Animals and Shadows

Match the animals to their shadows. Cut along the dotted lines. Place the cards, face down on a flat surface. Choose two as you work to match the animals to their shadows. If you find a pair, keep the cards. If you do not find a pair, turn the cards over in their place. Then, try again until you find all four pairs.

Shadow Cards

Instructions: Cut along the dotted lines. Invite someone to play a matching game with you. Place the cards face down on a flat surface. Choose two as you work to match the PBS KIDS characters to their shadows. If you find a pair, keep the cards. If you do not find a pair, turn the cards over in their place. Then, try again until you all find ten pairs. How many pairs did each player find? What strategy did you use to match the characters with their shadows?
