Patterns

BINGO

Learn at Home with PBS KIDS

**Week of
January 25th**

Hello, Families!

Welcome to **Learn Along Bingo!** We're happy to share PBS KIDS activities with you and to work with PBS member stations and community partners across the country to help support learning at home. With Learn Along Bingo, children can view, explore, and play as they learn alongside their PBS KIDS friends on the PBS KIDS 24/7 channel. We hope your family will use it to inspire learning each and every day.

It's Patterns Week!

In this packet, there are printable activities and everyday learning ideas for you and your child to choose from. As you complete each square, mark it off to celebrate the learning.

Learning Spotlight: Patterns

Recognizing patterns is important because it helps us to develop investigation and prediction skills. We learn how to solve even more challenging problems.

Show What You Know: Name That Pattern Activity

The last activity in this packet is a perfect way for children to learn about patterns.

Tune in: Watch ODD SQUAD at 1:30pm on Tuesday, January 26th on the PBS KIDS 24/7 channel.

Ready for more? Watch your favorite PBS KIDS shows on the 24/7 channel and live stream at pbskids.org/video/livetv or on your local PBS station.

Happy learning!

Number Line

Challenge your child to discover number patterns and solve number problems using a number line. Cut out the number line. Attach it to a piece of paper with small strips of tape at either end. Cut out the arrow strip. Fold it so the tail of the arrow can slide behind the bottom edge of the number line and the point of the arrow can slide up and down the number line.

Your assembled number line should look like this:

Once you have assembled the number line, challenge your child to:

- ➔ **Count to 10 by twos.** Slide the arrow along the number line landing on each number that you say aloud: 2, 4, 6, 8, 10.
- ➔ **Find a number.** Call out a number, and ask your child to move the arrow to that number. Ask your child to show you with the arrow which number comes before and after that number.
- ➔ **Solve an addition problem.** On paper write, $5 + 3 = \underline{\quad}$. Place the arrow on the number 5. Now move it up three numbers to get the answer (8).

Crack the Case!

CASE #1 Add It Up: Give your child a number problem to solve using the number line. You might say, *I saw three tomatoes fall from the sky. Oh wait, three more tomatoes just fell. How many tomatoes have fallen all together?*

CASE #2 I Forgot!: Tell your child that you caught a terrible case of Mathnesia, saying, *Oh no, I have forgotten everything I knew about numbers! You have to help me remember.* Ask a series of number questions that can be answered with a little help from the Odd Squad Number Line. You might ask, *What number comes before 9? If I'm counting by twos, what number do I say after 4? What's $6 + 3$? What's $7 - 4$?* Continue asking number questions until you're cured!

The Seasons

Name

There are four seasons each year: winter, spring, summer and fall. They always follow the same pattern. During each season, there are different activities we enjoy and different clothes we wear. Some animals, like bears, frogs, and bats, hibernate in the winter because it is cold. In spring, plants and trees grow buds and leaves. In summer, it might be hot and you might need to wear sunscreen and sunglasses. In fall, the leaves on trees may change colors and fall on the ground. Draw in each section of the wheel, one thing that you might see in each of the seasons.

 **Winter**

Spring 

 **Summer**

Fall

Nature Cat's Recycling Challenge

It is important for everyone to do their part to keep the world we live in beautiful. Recycling is a process that helps save our natural resources and protects animals too. In this activity, do your part and develop important early math skills by sorting recyclable materials into their correct bins.

What you'll need:

- 3 bins (labeled Paper, Cans, and Plastics)
- Materials to sort from the three categories: cans, soda bottles, water bottles, newspaper, magazines, looseleaf paper, etc.
- Scissors
- Crayons, colored pencils and/or paint

The Activity:

- There are three categories of materials: Papers, Cans, and Plastics
- Pick up materials to be tossed out and sort them in the correct bin.
- You will earn a 'Recycling Expert' badge that you can color- as you work to help care for the environment and each other.
- Encourage other people to help out and participate in the 'Recycling Challenge' too.

Name That Pattern

Name _____

Patterns can be found in art, nature, images, and be made with things like colors, numbers, letters, objects, or shapes. Practice identifying patterns and invite someone to join you! Cut the cards out and then lay them face down on a flat surface. Take turns choosing a card. Flip the card over and name what comes next in the pattern.
