# BINGO

# Learn at Home with PBS KIDS

**Week of  
May 17th**

## **Hello, Families!**

Welcome to **Learn Along Bingo!** We're happy to share PBS KIDS activities with you and to work with PBS member stations and community partners across the country to help support learning at home. With Learn Along Bingo, children can view, explore, and play as they learn alongside their PBS KIDS friends on the PBS KIDS 24/7 channel. We hope your family will use it to inspire learning each and every day.

### **It's All About Measuring Week!**

In this packet, there are printable activities and everyday learning ideas for you and your child to choose from. As you complete each square, mark it off to celebrate the learning.

### **Learning Spotlight: Measuring**

Children will learn that they can measure objects (with standard and nonstandard units of measurement).

### **Show What You Know: Cat Measuring Tool**

The last activity in this packet is a perfect way for children to learn about how to measure.

**Tune in:** Watch **CURIOUS GEORGE** at 4:30pm ET on Tuesday, May 18th on the PBS KIDS 24/7 channel.

Ready for more? Watch your favorite PBS KIDS shows on the 24/7 channel and live stream at [pbskids.org/video/livetv](https://pbskids.org/video/livetv) or on your local PBS station.

**Happy learning!**  
**PBS KIDS**

# Measuring Objects

Sid the Science Kid uses tools, like rulers, and even his own body to measure objects and distances. Rulers and measuring tapes are tools we use to measure things in inches and feet; which are examples of **standard units of measurement**. They are always the same. For this activity, you can explore measuring objects using a **non-standard unit of measurement**, which is something unique, like one of your hands!

## Steps:

1. Find a chair. Then **predict, or make a guess**, how many of your hands you will need to measure how tall the chair is. Record, or write, that number in the box, **“My Prediction.”**
2. Next, measure the object using one of your hands. Write that number in the box, **“My Measurement.”**
3. Was the number you predicted more, less than, or exactly right when you measured?

**Important Tips:** Choose either your right or left hand for this activity. (Don't switch hands!) Place your hand at the bottom of the object and mark the top of your hand, then reposition and repeat. Do not leave space between your hand as you measure the object.

# Cat Measuring Tool

Cat is my total hero and best friend. He's also an amazing measuring stick! Once on a desert island, I used Cat to measure my way to buried treasure! Now you can use Cat as a measuring tool, too. Just cut out the picture of Cat, line it up next to the thing you want to measure, and measure away.

As you measure, be sure the bottom of Cat's feet line up with the bottom of the object you are measuring.

**How many Cats long is your bed?  
How many Cats wide is your pillow?  
How many Cats tall are you?**

With your Cat measuring tool, you can measure your world in Cats!
