

ATTENTION: ANTENNA (OVER-THE-AIR) KLTS VIEWERS IN SHREVEPORT-AREA

How to Rescan Your TV

If you are no longer receiving KLTS's signal with your antenna you need to rescan your television set. Here is a helpful website that will explain how to do that: <https://www.tvanswers.org/rescan.asp>

Rescanned and Still Don't See LPB

If you are still having trouble receiving LPB's signal after rescanning, you may be one of the handful of viewers who will experience a temporary signal loss while we operate on our backup antenna at a lower power. LPB hopes to be back to full capacity by mid-October.

How to Watch LPB

The [free LPB App](#) allows you to watch many of your favorite LPB and LPB Kids programs on most devices. Many LPB and PBS programs are also available on-demand at video.lpb.org and at www.pbs.org. **You can live-stream PBS KIDS 24/7 online at www.lpb.org/kids or on a mobile device or tablet by [downloading our free LPB App](#).**

Contact Info

LPB apologizes for any inconvenience. When KLTS's permanent antenna is back up, our signal will be stronger than before, and reach even more households in your area.

If you have any further questions or issues, please email ccopeland@lpb.org or sringo@lpb.org.
